Dr. Palencar is a published author of fourteen articles, co-author of one article. He also authored thirty-three IAO Monthly Tips and he is a published author of 369-page manual "Case Finishing" for Rondeau Seminars.

# SEMINAR OVERVIEW AND MEETING DETAILS

## Course Description:

The speaker will be presenting interesting, and challenging cases. Some of them were verbalized and published in the International Journal of Orthodontics. The presented cases will entail a melange of TM dysfunction treatment - after the therapeutic position was crystalized, tooth transposition cases, cases treated with the assistance of Temporary Anchorage Device (TAD, Miniscrew). The presenter will also introduce the audience to the Micro osteo-perforation (MOP) technique. Following the conclusion of this presentation the attendees will have learned the principles and the protocol for stable finishing of patients with TM dysfunction. They also will have learned the indications and placement techniques of TADs and the advantages of accelerated orthodontic treatment with the assistance of the Micro osteo-perforation technique.
