SPECIAL SESSION

DR. BERNARDO H GARCIA

North Prairie, Wisconsin USA
Thursday, May 18, 2023

WEAVING THE INTERRELATIONSHIP BETWEEN BRACKET MECHANICS AND PROPER OCCLUSION; FINDING THE CORRECT BRACKET FOR EACH CASE

Description: Dr. Garcia will provide a special lecture that combines his half-day mechanics program with occlusal trouble shooting and planning the correct bracket treatment for easy, camouflage, and surgical cases.

This one-of-a-kind presentation will be provided. Attendees will learn the following outcomes:

- The Cause and Solution
- Wire Bending for Class II and III Mechanics
- Bend Negative Torque on Class II
- Lower Arch Plus Curve and Importance of Arches in Slot Use
- Occlusal Plane With Multiple Deviation, Skeletal, Dental or Both
- Detecting Devaitaion Issues From Early Ages to Adult Stages
- Selecting the Correct Bracket for Easy Cases, Camouflage Cases, and Surgical Cases

Dr. Bernardo Garcia holds Diplomate and Master Senior Instructor Certificates with the IAO. Dr. Garcia is also the Founder and Director of International Straight Wire and Orthopedic Seminars, Inc. (ISWOS) and the director of Centro de Orthodoncia in Tijuana, BC, Mexico with over 700 patients. Since June of 2019, Dr. Garcia has become the director of International Orthodontic Department at the UCAM in Spain. He has received dental and orthodontic degrees from National Autonomous University of Mexico and the University of Latin America, both located in Mexico City. Dr. Garcia has been involved in teaching orthodontics and functional appliances since 1985 throughout Canada, United States, Chile, Mexico, Puerto Rico, Poland, Spain, Holland, Portugal, Germany, and Australia. He has developed a diagnosis system that is extremely effective and uses a commonsense approach to mechanics and diagnosis. Dr. Garcia has established three orthodontic centers with teaching facilities in Germany, and Spain and over 30 study clubs set up for course participants to continue their orthodontic education.

Conflict of Commercial or Promotional Interests: None

TROUBLESHOOTING MECHANICS IN ORTHODONTICS

Description: Dr. Garcia will lead a half-day lecture on wire bending. As you can see below, it goes well beyond the simple mechanics. This is a fully encompassing course designed to guide attendees not only through bending, but also in identifying and troubleshooting common issues that arise and beyond.

Following the conclusion of this lecture, attendees will have gained understanding on:

- Wire Bending for Class II Mechanics
- Wire Bending for Class III Mechanics
- Bend Negative Torque on Class III
- Lower Arch Plus Curve
- Negative Torque Bend for Class II Mechanics on Lower Arch
- Importance of use of Arches in Slot
- Round Versus Rectangular
- Advantages of Self Ligating
- Double 3 Arch with Twin Brackets

Dr. Bernardo Garcia holds Diplomate and Master Senior Instructor Certificates with the IAO. He is also the Founder and Director of International Straight Wire & Orthopedic Seminars, Inc. (ISWOS) and Director of Centro de Orthodoncia in Tijuana, BC, Mexico, with over 700 patients. Since 2019, Dr. Garcia has become the director of International Orthodontic Department at the UCAM in Spain. He has received dental and orthodontic degrees from National Autonomous University of Mexico and the University of Latin America, both located in Mexico City. Dr. Garcia has been involved in teaching orthodontics and functional appliances since 1985 throughout Canada, United States, Chile, Mexico, Puerto Rico, Poland, Spain, Holland, Portugal, Germany, and Australia. He has Developed a diagnosis system that is extremely effective and uses a common sense approach to mechanics and diagnosis. Dr. Garcia has established three orthodontic centers with teaching facilities in Germany, and Spain and over 30 study clubs set up for course participants to continue their orthodontic education.
